

Volume 19 Author and Subject Index

A

adjacent categories, 91
Anderson, R. O., 257
Andrich, D., 101, 269
appropriateness measurement, 121, 213, 256
area measures, 309, 353
attenuation, 336

B

Bayesian estimation, 121, 256
Bernstein, I., 303
Billeaud, K., 39
Bobko, P., 336
Bock's nominal model, 143
Bost, J. E., 191
Bradley-Terry-Luce Model, 257
Budgell, G. R., 353

C

Carlson, J. E., 73
changing error variances, 191
Chen, T.-H., 257
choice models, 257
Clogg, C. C., 209
closed-interval measures, 131
cluster analysis, 241
Cohen, A. S., 167
compensatory DIF, 309
computer simulation, 177, 191
computerized adaptive testing, 5
construct validity, 241
content validity, 241
continuation ratios, 91
Correction, 256, 336
correction for attenuation, 336
correction for restriction of range, 336
correlated errors, 191
cubic spline, 177
cumulative probabilities, 91

D

Davison, M. L., 257
De Ayala, R. J., 5
dependability coefficients, 191
DIF methodology, 23
differential functioning of items and tests (DFIT), 309
differential item functioning, 23, 131, 309, 353
differential test functioning, 309

direct responses, 269
Dodd, B. G., 5
Dorans, N. J., 23
Drasgow, F., 1, 143

E

EM algorithm, 73, 291
equating, 167, 231
equipercentile equating, 177
estimation of standard error of estimators, 336

F

Feinstein, Z., 131
Fischer, G. H., 392
Fleer, P. F., 309
FORSCORE, 143
full-information item factor analysis, 73

G

Geisinger, K. F., 241
generalizability coefficients, 191
graded response model, 39, 167
graded responses, 101

H

Haladyna, T. M., 205
Hein-Eggers, M., 377
Hemker, B. T., 337
hyperbolic cosine model, 269

I

incomplete designs, 291
item bias, 23
item response theory, 39, 121, 131, 167, 213, 231, 256, 269, 323, 337, 353
item parameter estimation, 369
item reliability, 323

J

Jansen, M. G. H., 291
joining assumption, 101

K

Kim, S.-H., 167
Koch, W. R., 5
Kolen, M. J., 231

L

- language translations, 353
- latent class analysis, 377
- latent structure analysis, 377
- latent trait models, 269, 291
- Levine, M. V.*, 143
- Li, Y. H.*, 50, 72
- linear logistic test model, 369
- log odds differences invariance, 91
- logistic regression, 257
- Lord's χ^2 , 309, 353
- Lord DIF, 72
- LTDOMAIN, 50
- I_2 statistic, 213

M

- Mantel-Haenszel procedure, 353
- marginal maximum likelihood estimation, 291
- maximum likelihood estimation, 121, 256
- maximum likelihood formula scoring, 143
- McGuire, D. P.*, 257
- Mead, A. D.*, 143
- measurement of change, 377
- measurement model violation, 91
- Meijer, R. R.*, 166, 323
- Meiser, T.*, 377
- Mellenbergh, G.*, 91
- Minchi estimation, 369
- minimum χ^2 method, 167
- mixture distribution models, 377
- Mokken model, 323, 337
- Molenaar, I. W.*, 323, 337, 392
- monte carlo simulation, 131
- multidimensional item banks, 337
- multidimensional item response theory, 73
- multidimensional scaling, 241
- MULTILOG, 143
- multiple assessment modes, 51
- Muraki, E.*, 73

N

- Nering, M. L.*, 121, 256
- noncompensatory DIF, 309
- nonparametric item response models, 323, 337
- nonuniform DIF, 309
- numerical integration, 231
- Nunnally, J.*, 303

O

- observed-score equating, 231
- ordered responses, 39

P

- pair(ed) comparisons, 257, 269
- pairwise preferences, 269
- parameter invariance, 91
- path analysis, 336
- person fit, 121, 213, 256
- personality assessment, 213
- polytomous item response theory, 5, 51, 91, 101, 143
- polytomous models, 39
- polytomous response data, 73
- polytomous scoring, 5, 23
- Pommerich, M.*, 39
- Potenza, M. T.*, 23
- probit regression, 257
- pseudo-likelihood, 369

Q

- Quartetti, D. A.*, 353

R

- Raju, N. S.*, 309, 353
- range restriction, 336
- Rasch model, 101, 369, 377
- Rasch Poisson counts model, 291
- rater effects, 51
- rating scale model, 377
- Reichardt, C. S.*, 302
- Reise, S. P.*, 213
- response aberrancy, 213
- Rieck, A.*, 336
- Rompe, P.*, 377
- Rosenbaum, P. R.*, 302
- Rudinger, G.*, 377

S

- scalability coefficient H , 337
- scaled scores, 39
- scoring methods, 213
- signed area measures, 131
- Sijtsma, K.*, 323, 337
- Sireci, S. G.*, 241

smoothing, 177
standard error of functions of correlation
 coefficients, 336
statistical criteria, 23
subject-matter experts, 241

T

test construction, 241, 323, 337
test response function method, 167
Thissen, D., 39
Thorndike, R. M., 303
Thurstone model, 101
Thurstone's Law of Comparative Judgment, 257
Tisak, J., 209
Tsien, S., 143
two-parameter model, 213

U

unfolding models, 269

unidimensional scales, 337
uniform DIF, 309
unsigned area measures, 131

V

Vale, C. D., 205
van der Linden, W. J., 309
von Eye, A., 209

W

Wang, W.-C., 51
Weiss, D. J., 4
Williams, B., 143
Williams, V. S. L., 39
Wilson, M., 51, 392

Z

Zeng, L., 177, 231
Zwinderman, A. H., 369
